MODERN BUILDING SERVICES AND YOUR BUSINESS

With MBS, you can establish and maintain your brand along the specification chain.

MBS offers advertisers and marketers the controlled circulation for the building services industry in the UK (27,059 ABC). Our circulation database has been developed over 20 years.

MBS readers span the entire construction process from design consultant, to contractor, installer and end-user.

This is important because your product may be specified by the consultant – but the contractor has the power to change that.

And installers often deal directly with clients and offer their own recommendations on products and brands.

The strength of MBS is to speak to all those with influence on the specification and to ensure that the benefits of your (or your client's) product and brand are understood by all the professionals with influence.

Our circulation is externally audited for accuracy so you know where your budget is being spent.

ROUTES TO MARKET WITH MBS

OUR READERS – YOUR POTENTIAL BUYERS

With the highest circulation of any M&E building services publication, and our reputation for highly-informed content, we put your message in front of the right people.

REGIONAL BREAKDOWN

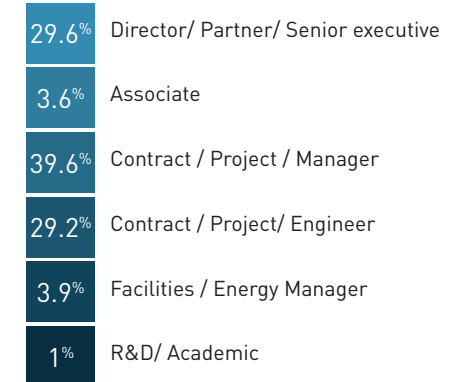

AREA OF INTEREST

Our audience includes M&E, Commissioning, Controls and BMS, Hard FM and Energy management, and both site and remote maintenance professionals.

MBS targets a professional, white collar audience of managerial level and higher.

Our readers cover the entire industry from design and specification, through installation and commissioning to maintenance, refurbishment and management.

MBS EMAIL MARKETING

Harness the power of digital marketing with our targeted online and email audience.

MBS Insider

This editorial email is sent to our readers twice a month.

We update over 20,000 of our readers on what's hot in news, and highlight our most popular features.

Welcome to the latest MBS digital edition

MBS
THE BENEFITS OF OFFSHORE CONSTRUCTION

At it's best, offsite construction can manufacture, transport and install on the same day. The UK tends to use offsite sub-assembly, but that's not the only option, as our cover article explains.

This issue we're also looking at retrofit, ductwork testing, the use of predictive AI to improve building health and performance, and plenty more. Read on!

[Click here to read the latest issue now.](#)

Highlights

[Upping the game of predictive analytics](#)

AI has broken through to the mainstream in the last 18 months, and the impact is being felt in Building Services.

LOOSE AND BOUND-IN INSERTS

A cost efficient way of promoting and circulating your company's literature to our entire circulation.

Rates on application.

FRONT COVER SPONSORSHIP

MBS front cover sponsorship associates your brand with prestigious building projects.

This is our premium communications medium which is used to dramatically raise corporate and product profile.

For examples of past front covers and content page details, please go to our digital issues archive at www.modbs.co.uk

Rates on application.

THE PACKAGE INCLUDES THE FOLLOWING:

Front Cover Photograph, together with a single company logo and strapline.

A reproduction of the front cover placed on the Comment page, together with 90 words of text and a reader enquiry number. Package can also include a page of advertorial about the front cover image.

MBS ROUND TABLE – BE A STRONG VOICE IN THE INDUSTRY

The MBS Round Table is an opportunity to co-host a lively debate with MBS, and to be seen as thought leaders in the industry.

MBS will work with you as our sponsor to devise an appropriate subject for the discussion, which is chaired by us, with you as our co-host. We will also assist with identifying interesting guests. The resulting three-page article appears in MBS.

BRINGING THE INDUSTRY TOGETHER TO DISCUSS THE TOPICS THAT MATTER

FULL sponsorship package, covering editorial, advertising and online coverage of your event.

THE SPONSORSHIP PACKAGE INCLUDES:

- Participation of a delegate at the MBS Round Table.
- Acknowledgment as sponsor at the event and within MBS.
- MBS Round Table article published within the magazine and online.
- Promotion via social media
- Full page advertisement placed strategically within MBS.

Rate: Price on application

The collage displays three pages from the MBS magazine. The left page features a photograph of a roundtable discussion with several men seated around a table. Below the photo is the headline "NO SMOKE WITHOUT FIRE" and a sub-headline: "Smoke control can be an essential part of the life safety systems in buildings, yet there is evidence that suggests systems are of variable quality. Can a new British Standard help to improve industry practices and save lives? MBS convened a roundtable to look at how BS 7344 Part 8 can make a difference, as Andrew Brindley reports." The middle page is titled "Who's who on the panel" and lists several industry experts including Neil Thomas, Andrew Hurrell, Matt Purvis, Matthew Ryan, and Stuart Water. The right page features a headline: "Anyone can call themselves a fire engineer, get insurance and practice?" and includes a photograph of a man speaking.

WHAT'S NEW

Allied Telesis to showcase smart networking solutions at Smart Buildings Show 2024

Allied Telesis will be exhibiting at Smart Buildings Show, 19th-20th October, CoCo London, showcasing products and technologies providing IoT and SD-WAN-enabled solutions for enterprise, government, education and critical infrastructure customers.

Visitors to stand D18 will be able to learn about Allied Telesis' portfolio of products, technologies and managed services for smart buildings.

Allied Telesis' managed services division delivers customised, state-of-the-art IoT solutions at the edge, empowering innovation. Improving process agility and helping build a competitive advantage for customers globally.

Allied Telesis will be showcasing its end-to-end range of solutions, optimised for enterprise customers focused on high availability as well as options for customers who want the same look and feel but with a more attractive price point.

Also on the stand will be industrial solutions that are ideal for usage in lift shafts, risers and roof spaces without the need for conditioned air and wireless and security solutions with the same look and feel as the rest of the portfolio so that the customer/integrator only needs a single interface across the building/campus.

Altecnic releases heat pump focused issue of Idronics UK

Altecnic has launched the sixth issue of its technical journal, Idronics UK. This latest edition focuses on heat pump systems, providing essential information on air-to-water heat pump design, advice on componentry and relevant updates for the industry.

The lead editorial offers detailed guidance on the design of efficient air-to-water heat pump systems. With the use of detailed diagrams, critical aspects such as system layout, component selection and performance optimisation are all discussed. Readers will benefit from expert advice on overcoming common challenges and maximising the benefits of air-to-water heat pump technology.

Throughout the new edition are a range of practical instructions for installing key components of heat pump systems. This includes step-by-step installation guides and technical focus pieces for anti-freeze valves and the Caleffi X2 air and air heat pump filter, both crucial for maintaining system integrity and performance.

Also included in the latest edition of Idronics UK is a range of information on Altecnic's extended product offering for heat pump solutions.

www.altecnic.co.uk/technical-fish/idronicsuk/

Baxi launches Auriga HP+ R290 (propane) high temperature commercial heat pump

Baxi has announced the arrival of its Auriga HP+ R290 (propane) high temperature air-to-water microchiller heat pump range.

The new Baxi Auriga HP+ is a natural refrigerant air source heat pump (ASHP) with excellent low Global Warming Potential (GWP) of 1 for a lower environmental impact and improved efficiency and sustainability.

Capable of delivering high flow temperatures up to 80°C, the Auriga HP+ is the perfect solution for a range of demanding applications.

Easily integrated into existing heating systems, the Auriga HP+ provides greater options to overcome retrofit challenges. Its ability to achieve higher flow temperatures makes it equally suited to delivering low-carbon domestic hot water (DHW) requirements across a range of applications, from commercial buildings to heat networks and district heating schemes.

The new Auriga HP+ offers extremely high efficiencies, delivering Seasonal Coefficient of Performance (SCoP) scores of up to 5.17 at W35 and 3.36 at W55. The units are manufactured with an inverter driven scroll compressor which enables modulation down to 13%, helping to improve efficiency still further.

www.baxi.co.uk

Fujitsu launches new 'soft black' wall mount

Fujitsu General Air Conditioning UK has added a new 'soft black' version to its AIRSTAGE wall mount range that can be connected to split and multi-split systems.

Operating on lower GWP R32 refrigerant and available in capacities from 2 to 4.2kW, the new unit has a compact chassis depth of just 220mm thanks to the design of its high density microchiller heat exchanger.

Built-in Wi-Fi capability makes it controllable via the AIRSTAGE Mobile App, with service and maintenance improved due to refrigerant cycle data being displayed on a compatible wired controller.

Cooling is available between -10°C and 50°C, with heating from -15°C. The large inverter design enables the unit to achieve a Seasonal Energy Efficiency Ratio (SEER) of up to 8.4 in heating mode and a Seasonal Coefficient of Performance (SCoP) of 4.6 for cooling.

The large cross-flow fan aids efficiency and ensures effective airflow, which is achieved with quiet operating levels as low as 20dB(A) in cooling. A 20m pipe length and 10m elevation is possible on all models, which are pre-charged for 15m of pipework. This removes the potential additional installation cost of refrigerant charges on site.
